SUMMARY

DevOps Engineer with **2+ years** of experience supporting cloud-native applications across **AWS** and **Kubernetes** environments. Skilled in **CI/CD automation**, **Docker**, **Helm**, **GitHub Actions**, **Argo CD**, monitoring, and production troubleshooting. Hands-on experience building **AI-powered Kubernetes troubleshooting** solutions and deploying scalable applications on **AWS EKS**.

SKILLS

- **Cloud & Infrastructure:** AWS (EC2, ECS, EKS, ALB, Lambda, IAM, S3, CloudWatch), Azure, GCP, Kubernetes, Terraform, Linux.
- **DevOps & Container:** Docker, Helm, Argo CD, GitLab CI/CD, GitHub Actions, NGINX Ingress, Git.
- **Monitoring & Security:** Prometheus, Grafana, Splunk, SonarQube, Vault, Snyk.
- **Programming & AI:** Python, SQL, YAML, HTML, CSS, React, FastAPI, Claude (LLM), Prompt Engineering.

PROFESSIONAL EXPERIENCE

OPT IT Technologies | DevOps Engineer | Sept 2025 – March 2026

Project: ParkQuility and Shikshalokam

- Support production cloud-native applications on **AWS**, ensuring infrastructure stability across multiple environments.
- Manage and troubleshoot **AWS services** including **EC2, ECS, ALB, Lambda, IAM, and CloudWatch** to resolve deployment and runtime issues.
- Configure and maintain **CloudWatch alarms** for **10+ EC2 instances**, enabling proactive monitoring and incident detection.
- Execute Linux administration tasks including **SSH access setup**, sudo provisioning, and **GCP bastion host** storage expansion.
- Maintain CI/CD workflows, supporting container-based deployments and release validation for cloud-hosted applications.

Dell Technologies | DevOps Engineer | June 2024 – July 2025

Project: DMX MyAccount – KOB Migration

- Migrated **25+ micro frontends (MFEs)** from PCF to **Kubernetes on Bare Metal (KOB)**, improving scalability and reducing platform dependency.
- Reduced deployment configuration errors by **40%** by developing reusable **Helm templates** across multiple Kubernetes environments.
- Standardized containerization strategy by designing **Dockerfiles** optimized for smaller image size and faster startup time.
- Eliminated configuration drift across environments by centralizing configuration management using **KOBACE**.
- Improved release reliability and deployment consistency by automating **CI/CD workflows** using **GitLab pipelines**.

Tequed Labs | DevOps Intern | Nov 2023 – May 2024

- Containerized applications using **Docker** by creating optimized Dockerfiles and managing container lifecycles.
- Built and maintained **GitLab CI/CD** pipelines using YAML to automate build and deployment workflows.
- Worked with **AWS** (EC2, S3, IAM), **Azure**, **Kubernetes**, and **Helm** to support cloud-native application deployments.
- Supported AI/ML applications by managing **Linux** environments, dependencies, and containerized model execution.

PROJECTS

AI Powered Kubernetes Troubleshooting Agent

- Designed and developed an **AI-powered Kubernetes troubleshooting** platform using React/Next.js, **FastAPI**, and **Claude (LLM)** to automate pod failure diagnosis.
- Developed a kubectl-based investigation engine to analyze pods, logs, events, and deployments, identifying issues such as **CrashLoopBackOff**, **ImagePullBackOff**, and **OOMKilled**.
- Integrated **InsForge** for authentication, real-time tracking, and AI-powered root cause analysis.
- Debugged and resolved application and **Kubernetes** issues, including OOM misclassification, event parsing, Docker, and CORS configuration, validated on a live Kubernetes cluster.

Three-Tier Microservices Architecture Deployment (Stan's Robot Shop)

- Deployed a microservices-based application on **Amazon EKS** consisting of services like cart, catalogue, user, shipping, and payment.
- Configured **IAM OIDC**, **AWS Load Balancer Controller (ALB)**, **Kubernetes Ingress**, and **Amazon EBS CSI** for secure networking and persistent storage.
- Diagnosed and resolved Kubernetes pod scheduling issues by scaling the **EKS** node group.

End-to-End CI/CD and GitOps Deployment on AWS EKS

- Containerized a Go web application using **Docker** and automated image builds via **GitHub Actions**.
- Developed reusable **Helm** charts and implemented GitOps-based deployments on **AWS EKS** using **Argo CD**.
- Configured **NGINX Ingress** for application routing, enabling a fully automated end-to-end CI/CD deployment pipeline.

EDUCATION

JSS Academy of Technical Education | Bachelor of Engineering in Computer Science

CGPA: 8.46 | Bengaluru, India | 2019 – 2023
