SUMMARY

DevOps Engineer with 2+ years of experience in **AWS, Kubernetes, Docker, and CI/CD automation**. Experienced in deploying scalable applications on **AWS EKS using Helm, GitHub Actions, and Argo CD**. Familiar with **Azure fundamentals**, skilled in automation and supporting production system.

SKILLS

- **Cloud & Infrastructure:** AWS (EC2, ECS, EKS, ALB, Lambda, IAM, S3, CloudWatch), Azure (Virtual Machines, Azure DevOps, Storage Accounts, Resource Groups, Basic Networking), GCP (Compute Engine), PCF, Kubernetes, Terraform, Linux, NGINX Ingress.
- **DevOps & CI/CD:** GitLab CI/CD, GitHub Actions, Argo CD, Helm, Docker, KOB, KOBACE, Grafana, Prometheus, SonarQube, Vault, Snyk, Splunk, Confluence.
- **Programming & Web:** Python, SQL, HTML, CSS, React, YAML.
- **Other:** Git, Data Structures & Algorithms, Debugging & Troubleshooting

PROFESSIONAL EXPERIENCE

OPT IT Technologies | DevOps Engineer | ***Sept 2025 – Present***
Project: ParkQuility and Shikshalokam

- Support production cloud-native applications on **AWS**, ensuring infrastructure stability across multiple environments.
- Manage and troubleshoot **AWS services** including EC2, ECS, ALB, Lambda, IAM, and CloudWatch to resolve deployment and runtime issues.
- Configure and maintain **CloudWatch alarms** for 10+ EC2 instances, enabling proactive monitoring and incident detection.
- Execute Linux administration tasks including **SSH access setup**, sudo provisioning, and **GCP bastion host** storage expansion.
- Maintain **CI/CD workflows**, supporting container-based deployments and release validation for cloud-hosted applications

Dell Technologies | DevOps Engineer | ***June 2024 – July 2025***
Project: DMX MyAccount – KOB Migration

- Migrated **25+ micro frontends (MFEs)** from PCF to **Kubernetes on Bare Metal (KOB)**, improving scalability and reducing platform dependency.
- Reduced deployment configuration errors by **40%** by implementing **Helm-based reusable templates** across multiple environments.
- Standardized containerization strategy by designing **Dockerfiles** optimized for smaller image size and faster startup time.
- Eliminated configuration drift across environments by centralizing configuration management using **KOBACE**.
- Improved release reliability and deployment consistency by automating **CI/CD workflows** using **GitLab pipelines.**

Tequed Labs | **DevOps Intern** | ***Nov 2023 – May 2024***

- Containerized applications using **Docker**, writing optimized Dockerfiles and managing container lifecycles in **Linux environments.**
- Assisted in building **GitLab CI/CD** pipelines using **YAML** configurations to automate build and deployment workflows.
- Gained foundational experience with **AWS** (EC2, S3, IAM) and **Azure** (Virtual Machines, Storage Accounts) while supporting **Kubernetes** and **Helm-based** deployments.

PROJECTS

Three-Tier Microservices Architecture Deployment (Stan's Robot Shop)

- Deployed a microservices-based application on **Amazon EKS** consisting of services like cart, catalogue, user, shipping, and payment.
- Provisioned the Kubernetes cluster using **eksctl** and configured **IAM OIDC provider** for secure service account integration.
- Installed **AWS Load Balancer Controller** to expose the application via **Application Load Balancer (ALB)** using Kubernetes Ingress.
- Implemented persistent storage using **Amazon EBS CSI driver** for stateful services such as **MySQL and MongoDB**.
- Diagnosed and resolved Kubernetes pod scheduling issues by scaling the **EKS node group**.

End-to-End CI/CD and GitOps Deployment on AWS EKS

- Containerized a **Go web application** using **Docker** and automated image builds via **GitHub Actions**.
- Built reusable **Helm charts** to deploy and manage applications on **AWS EKS** with version-controlled configurations.
- Implemented **GitOps-based deployment** using **Argo CD** to automatically sync changes from GitHub to Kubernetes.
- Configured **NGINX Ingress Controller** to achieve a fully automated end-to-end deployment pipeline.

EDUCATION

JSS Academy of Technical Education | Bachelor of Engineering in Computer Science
CGPA: 8.46 | Bengaluru, India | 2019 – 2023
